

## Solving Problems Providing Solutions

### JEP's Cloud- Based Solutions

We are a leading provider of enhanced cloud services. Delivering mission-critical products engineered for the SMB and LE Markets. We've designed our network with only the most reliable and dependable network components, including BroadSoft™, Cisco™, IBM®, and Acme Packet™ with established redundant connections, to support both public and private traffic to our secure facilities. JEP's geo-redundant infrastructure provides the most secure and highly available network in today's cloud computing market.

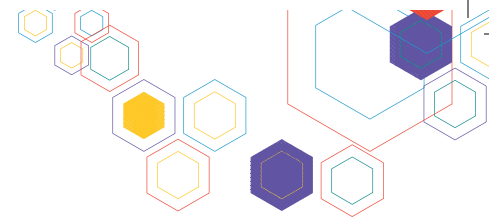

### Hosted PBX & SIP Trunking

With this rapid migration, JEP offers two major flagship products: **JEP Hosted PBX** and **JEP SIP Trunking**. JEP Hosted PBX is a secure cloud-based PBX solution in which all business phones connect and operate off of our redundant and geographically-dispersed BroadSoft switches. JEP delivers your voice solution in a cloud-based, voice-as-a-service model. JEP SIP Trunking consists of talk paths delivered to your existing PBX enabling you to convert your legacy or IP-PBX into a more flexible and technically advanced solution.

Communication is rapidly migrating from premise-based to cloud-based.

# Providing Solutions

Businesses are finding new levels of productivity with:

### Hosted PBX

Hosted PBX is a secure cloud-based PBX solution in which all business phones connect and operate off of our redundant and geographically-dispersed BroadSoft switches.

### SIP Trunking

SIP Trunking consists of talk paths delivered to your existing PBX enabling you to convert your legacy system to a cloud-based one.

### Analog Trunk Replacement

Phone carrier and line are removed, consolidating your communication charges, allowing you to take advantage of JEP's unparalleled calling features and rates.

### Smart Record

SmartRecord is a value-added optional feature that enables both inbound and outbound calls to be recorded and stored as MPEG files.

# Communications Re-defined.

### Broadworks Meet-Me Audio Conferencing

A high quality conferencing application that is part of BroadSoft's Unified Communications capabilities, enabling service providers to offer HD conferencing

### BluIP Chrome Dialer

A fully integrated Chrome Dialer Extension with Salesforce and eAgent built-in. Our dialer will work with your PBX phone systems as well as just using the browser window.

### Enhanced Call Center

Enhanced Call Center will make quality control and agent/customer reporting a breeze.

### Virtual Fax

Send all of your faxes and voicemails to your email inbox with Virtual Fax.
